

5300 Series
Replacement Windows

Exceptional windows for
unsurpassed comfort,
efficiency, durability,
security and beauty.

Gorell[®]
WINDOWS & DOORS

Gorell 5300 Series Windows Make Homes More Comfortable, Energy Efficient and Secure.

LOWER YOUR ENERGY BILLS.

Gorell 5300 windows are engineered to be airtight—so you won't feel uncomfortable drafts around them in cold weather. In fact, they'll help maintain constant temperatures throughout your home, and that means healthier, more comfortable living—and lower home energy costs.

PROTECT YOUR FAMILY AND HOME.

We build our products especially tough to provide the best possible protection at your home's most vulnerable intruder points. We design our windows so the sashes can't be forced open—not even with a crowbar—and we even use special locks that keep little fingers from easily operating them. These and other features enable our windows to pass all industry forced-entry tests.

SAVE TIME ON CLEANING AND MAINTENANCE.

You'll find that Gorell windows need little or no maintenance—and require less time and effort to clean than other windows. Our double-hung models tilt in easily and lock in place securely for cleaning. 5300 Series sliding windows are available in lift-out models or Tilt 'N' Slide™—to make cleaning your windows easier than ever.

Gorell—Exclusive window partner with the National Crime Prevention Council, offering intruder-resistant windows and doors.

National ENERGY STAR® Partner of the Year every year since 2004.

Gorell 5300 Series double-hung windows are Green Seal™ certified.

Standard Features of 5300 Series Windows

1. Expertly engineered, durable vinyl frame with up to 14 structural hollows provides exceptional strength and insulating properties.
2. Robotically sealed corners ensure the window stays square and will never require sealants. They also will prevent water and air from entering your home.
3. Insulfil™ foam in the frame significantly improves thermal efficiency.*
4. Automotive-type glazing adheres the glass to the sash and creates a seal so tight that nothing can get through.*
5. Unique ventilation limit latches allow you to let in refreshing breezes without sacrificing safety and security.
6. Gorell's "Constant Force" balance system on double-hung models lets you operate your windows with just the touch of a finger.*
7. Easy-pull tilt latches on double-hung models provide "tilt in" operation on both sashes for unbelievably easy cleaning.
8. Premium-grade multi-fin weather seals create an airtight seal.
9. Classic millwork design provides an elegant look typically associated with handcrafted moldings.

* Features not visible in photograph because of their location inside window frame.

5305 double-hung window in optional Golden Oak.

TILT 'N' SLIDE WINDOWS

Tilt 'N' Slide™ hardware allows sashes of sliding windows to conveniently pivot in for easy cleaning and full ventilation.

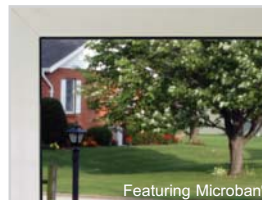

LIFT-OUT SLIDERS

The 5300 Series family of products also features a lift-out sliding model for easier access to the window exterior.

10. Heavy-duty aluminum screen frames feature BetterVue™ screens that give you a clearer view of the outdoors and added airflow.

11. Heavy-duty cam sweep locks give your windows vise-like strength and security.

12. The Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance.

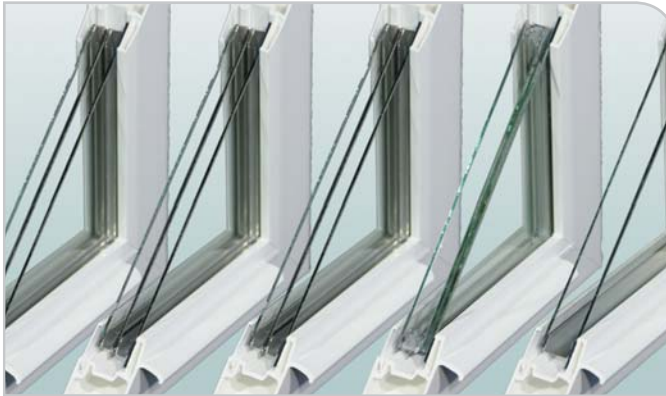

13. Insulating foam wrap creates another barrier to eliminate drafts coming up through your home's wall cavities.

HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers numerous unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve. Practically all 5300 Series windows that incorporate one of these glass systems qualify for the ENERGY STAR® label.

DECORATIVE GLASS

5300 Series windows with beautiful stained and leaded glass designs allow sunlight to spill uniquely fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns and etched glass designs.

Marquis V-groove

Montecito Stained Glass

SOLARSHINE™

This coating almost seems to make exterior glass clean itself. It uses a remarkable process that enables the sun's rays to actually loosen and break down dirt, which is then easily washed away by the rain.

INTERBLINDS™

Amazing "between-the-glass" blinds provide instant privacy, shade, comfort and beauty. They are easy to operate and never require cleaning.

INTERNAL GRIDS

Finely detailed contoured internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes.

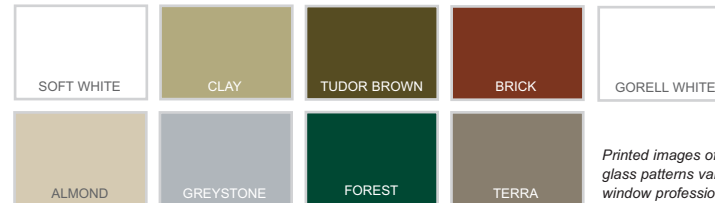

Give Your Home a Unique, Personalized Look.

Gorell offers a myriad of options to allow you to truly custom design windows that meet your unique needs and personal preferences. Choose from various color combinations, decorative glass patterns and much more.

COLOR OPTIONS

A palette of beautiful colors allows you to coordinate or contrast your windows to your home—giving your home an all-new ambiance, inside and out. Choose from white, almond or numerous interior woodgrain finishes—and from an unlimited array of exterior color options. Gorell can also have your windows manufactured in virtually any exterior custom color you request.
