

Handcrafted windows that  
expand your living area  
and provide a superb view  
and a more beautiful home.

**7000 Series**  
Bow & Bay Windows

# Gorell 7000 Series Windows— for a Great View, Superior Energy Efficiency and Easy Operation.

## EXPAND YOUR VIEW. BEAUTIFY YOUR HOME.

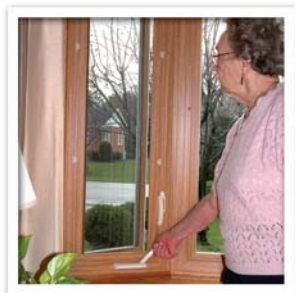

Transform an ordinary room into the most beautiful and preferred area in your home—a place with practically everything you could want, such as splendor, comfort, functionality, versatility and personality. A bow or bay window handcrafted by Gorell introduces more natural light, expands your view of the outdoors, and actually makes the room larger.

## CONTROL YOUR HOME ENERGY COSTS.

Gorell bow and bay systems are engineered and designed to provide excellent thermal efficiency—and lower energy bills. You'll experience greater comfort in your home—with fewer drafts and more constant temperatures.

## EXPERIENCE YEARS OF SMOOTH, RELIABLE OPERATION.

Choose from turn-handle casement windows—which open on the side and swing out for full, top-to-bottom ventilation—or classic double-hung models that tilt and lock in place for easy cleaning. Both styles of windows will provide you with decades of smooth, reliable operation.

Gorell—Exclusive window partner with the National Crime Prevention Council, offering intruder-resistant windows and doors.

National ENERGY STAR® Partner of the Year every year since 2004.

Gorell replacement double-hung windows are Green Seal™ certified.

# 7000 Series Standard Features

1. Robotically sealed corners ensure the window stays square and will never require sealants. They also will prevent water and air from entering your home.
2. Vinyl frames and sashes feature an exceptionally smooth, clean surface that keeps your Gorell windows looking stunningly beautiful for decades.
3. Engineered Truth® turn-handle systems (casement models) make operation of windows easier than ever—and add a distinct touch of class to your home.
4. Heavy-duty locking system on casement models provides optimal security and super-tight closure. The single lever locks the window at one or more points (up to four).
5. Elegant, handcrafted wood seatboards and trim—available in birch or oak—offer the look and feel of fine furniture and give your home an elegant, sophisticated look.
6. Automotive-type glazing adheres the glass to the sash and creates a seal so tight that nothing can get through.\*
7. Heavy-duty, 1-1/4"-thick wood in the head, seat and jamb boards provides exceptional strength and outstanding durability.\*
8. Unique, specially designed adjustable installation system virtually eliminates sagging—and the need for knee braces.\*
9. Gorell's "Constant Force" balance system on double-hung models lets you operate your windows with just the touch of a finger.\*
10. Heavy-duty aluminum screen frames feature GREENGUARD® certified BetterVue™ screens that give you a clearer view of the outdoors—and the added airflow you'll get for ventilation is almost like having no screen at all.\*

\* Features not visible in photograph because of their location inside window frame.

7000 Series bow window system with three fixed lites and two casement sections, shown in optional golden oak finish.

Gorell bay windows are available in two distinct models—30-degree bay and 45-degree bay.

Bow windows are offered in many different styles—including three-lite, four-lite, five-lite and six-lite.

11. The Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance.

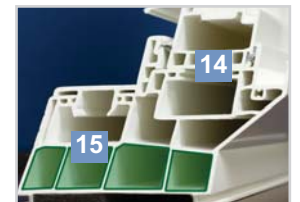

12. Patented scupper system prevents moisture from accumulating in the window frames by channeling it outside.

13. GAF Weather Watch sealant coating prevents water from entering into your home.

14. Frames feature as many as 14 separate chambers to improve insulating properties.

15. Insulfil™ foam inside select frame chambers also improves thermal efficiency.

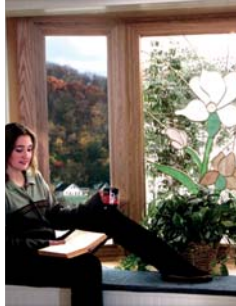

### HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers several unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve. Practically all 7000 Series windows that incorporate one of these glass systems qualify for the ENERGY STAR® label.

### DECORATIVE GLASS

7000 Series windows with beautiful stained and leaded glass designs allow sunlight to spill uniquely fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns and etched glass designs.

### RECESSED LIGHTING

Recessed halogen lighting brings a decorative ambiance and warmth to your room.

### INSULATED SEATBOARD

Foam-insulated seatboard keeps the sill warm—even in cold weather.

### SOLARSHINE™

This specialty glass keeps the exterior of your new windows looking clean forever because, remarkably, it uses the sun's rays to loosen and break down dirt from its ultra-smooth surface.

### INTERBLINDS™

Amazing "between-the-glass" blinds provide instant privacy, shade, comfort and beauty. They are easy to operate and never require cleaning.

### INTERNAL GRIDS

Finely detailed contoured internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes.

# Give Your Home an Entirely New Look.

A myriad of options allows you to truly custom design your new Gorell bow or bay window so that it becomes a reflection of your own unique needs and preferences. You can choose options to match the window to the architectural look of your home, provide just the right amount of privacy or achieve exactly the level of comfort you desire.

## COLOR OPTIONS

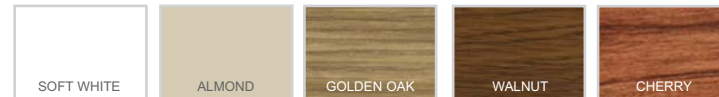

A palette of beautiful colors allows you to coordinate or contrast your windows to your home—giving your home an all-new ambiance, inside and out.

### EXTERIOR COLORS

*Printed images of colors vary, so please ask your window professional to see actual samples.*
