

Elegantly styled windows that lower home energy costs and provide security, exceptional comfort and directed ventilation.

3000 Series
Casement & Awning Windows

Gorell[®]
WINDOWS & DOORS

Gorell 3000 Series Windows Provide Greater Comfort and Energy Cost Savings.

SEE AND FEEL THE DIFFERENCE!

If you appreciate clean lines, a wide-open view and springtime breezes—as well as free time—you'll really like Gorell casement and awning windows.

These products are some of the most energy-efficient operating windows available in America. You'll see lower home energy consumption and experience a new dimension of comfort in your home. Say goodbye

to uncomfortable drafts and enjoy constant temperatures in your home year round.

KEEP INTRUDERS OUT.

Gorell projecting windows close tightly and securely, giving your home a high level of protection. The superior multi-point locking hardware and exceptionally strong construction of Gorell 3000 Series windows are why they're among a very select group of vinyl windows to pass American Architectural Manufacturers Association (AAMA) forced-entry tests.

EXPERIENCE DECADES OF SMOOTH, RELIABLE OPERATION.

Gorell casements open—near effortlessly—on the side and swing out for full, top-to-bottom ventilation. Awning windows open out from the bottom. With the turn of a handle, you can pull in a summer breeze while allowing your windows to remain open during a light rain—the perfect blend of practicality, beauty and efficiency.

Gorell—Exclusive window partner with the National Crime Prevention Council, offering intruder-resistant windows and doors.

National ENERGY STAR® Partner of the Year every year since 2004.

Gorell high-performance windows—GreenSpec labeled for their energy efficiency and environmental benefits.

Standard Features of 3000 Series Windows

1. Robotically sealed corners ensure the window stays square and will never require sealants. They also will prevent water and air from entering your home.
2. Expertly engineered, durable vinyl frame with multiple structural hollows provides extraordinary strength and insulating properties.
3. Automotive-type glazing adheres the glass to the sash and creates a seal so tight that nothing can get through.*
4. Insulfil™ foam inside the frame chambers drastically improves thermal efficiency.*
5. Classic millwork design provides an elegant look typically associated with handcrafted moldings.
6. Heavy-duty aluminum screen frames feature BetterVue™ screens that give you a clearer view of the outdoors, and the added airflow you'll get for ventilation is almost like having no screen at all.*
7. Beveled exterior frame is especially attractive to give your home absolutely beautiful curb appeal.*
8. Premium-grade multi-fin weather seals create an airtight seal.
9. Beautiful Truth Encore® hardware ensures exceptionally easy, problem-free operation—even for larger vent sizes. (Optional corrosion-resistant stainless steel hardware available for applications such as homes in coastal locations.)
10. Insulating foam wrap creates another barrier to eliminate drafts coming up through your home's wall cavities.

SECURITY FEATURES

A single lever locks casement windows at one or more points (up to four, depending on window height) for excellent security and closure.

On Gorell awning windows, our custom-engineered lock-and-seal system features two lever locks that pull the sash in securely for a tight, full-perimeter seal.

Snubber mechanism on the hinge side of the frame creates a tight, full-perimeter seal.

11. The Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance.

12. Q-Lon ultra-compression weather seal provides super-tight closure—similar to a refrigerator door—to prevent air and water from entering your home.

13. Newly designed, elegant folding handle minimizes possible interference with window treatments and adds a touch of sophistication to your windows.

* Features not visible in photograph because of their location inside window frame.

HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers numerous unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve. Practically all 3000 Series windows that incorporate one of these glass systems qualify for the ENERGY STAR® label.

DECORATIVE GLASS

3000 Series windows with beautiful stained and leaded glass designs allow sunlight to spill uniquely fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns and etched glass designs.

Marquis V-groove

Montecito Stained Glass

INTERNAL GRIDS

Finely detailed contoured internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes.

INTERBLINDS™

Amazing "between-the-glass" blinds provide instant privacy, shade, comfort and beauty. They are easy to operate and never require cleaning. (Available on casement windows.)

SOLARSHINE™

This specialty glass keeps the exterior of your new windows looking clean forever. It uses a remarkable process that enables the sun's rays to actually loosen and break down dirt, which is then easily washed away by the rain.

Give Your Home a Stylish, One-of-a-kind Appearance.

Gorell offers you almost limitless possibilities for creating a beautiful and truly unique look for your home. Express your individual taste by adding a touch of elegance to your windows—or introducing spectacular colors and artistic designs into rooms. Choose from a range of vinyl color options, grid styles, decorative glass patterns and other options.

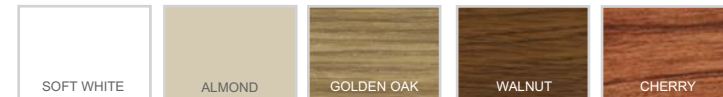

COLOR OPTIONS

A palette of beautiful colors allows you to coordinate or contrast your windows to your home—giving your home an all-new ambiance, inside and out.
